Remote work rules

This guideline applies to all employees of Halden Freight who work outside the office. Employees may work remotely up to 2 days per week. Interns may work remotely 1 day per week. When working remotely, employees must be reachable during core hours, which are from 9:00 to 16:00 on working days. Remote work from outside the European Union requires written approval from HR at least 4 weeks in advance.

Security when working remotely

Remote access to company systems is only allowed through the company VPN with two-factor authentication. Passwords for company accounts must be changed every 180 days. A lost or stolen company laptop must be reported to the IT service desk within 72 hours. Company devices must not be used by family members. Employees receive a monitor and a keyboard for their home office on request.
